Healthy Volunteers Needed
for Research Study in Nutrition and Exercise Physiology

This study is designed to learn more about why young women are protected from high blood pressure associated with sleep apnea.

We are looking for:
- Healthy men and women
- Ages 18-45 years
- Non-obese and non-smokers
- Not using oral contraceptive (birth control) pills
- Additional criteria may apply

Participation includes:
- One 1-hour screening visit (Men and Women)
- One 3-hour study visit (Men)
- Two 3-hour study visits (Women)
- Individual study measurement results
- Compensation for your time

If interested, please contact: Jennifer Harper, Research Coordinator
