Participants Needed
for Research Study in Nutrition and Exercise Physiology

This study will examine how the nervous system controls blood pressure while using a hand-grip measurement device in patients with diabetes.

We are looking for:
✓ Healthy men and women
✓ Men and women with Type 2 Diabetes
✓ Ages 18-55 years
✓ Non-smokers
✓ Additional criteria may apply

Participation includes:
• A 1.5-hour screen visit and a 4-hour study visit
• Individual study measurement results
• Compensation for your time
