

Help Us Learn About Type 2 Diabetes

Seeking volunteers for clinical research Study!

The purpose of this study is to better understand how the nervous system controls blood pressure responses to hand-grip exercise in patients with diabetes.

What's involved with the study?

- Pre-screening Questionnaire
- One 2-hour screen visit
- One 4-hour research visit
- Monetary compensation provided

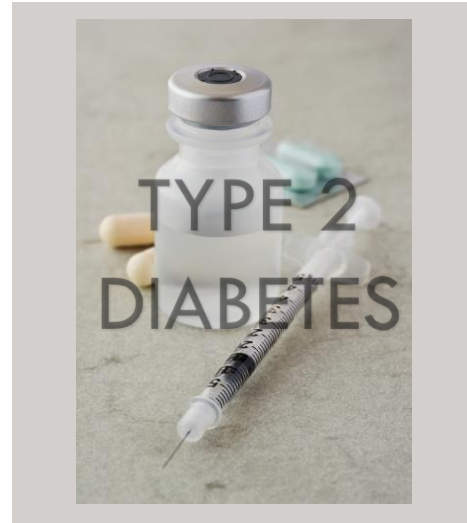

Flexible scheduling, including weekends available!

Learn more about your health!

Receive blood tests results for insulin, glucose, HbA1c, lipid, and stress hormone levels. You will also have a body composition scan (DEXA) and can access those results!

Help others!

You may expect to benefit from taking part in this research to the extent that you are contributing to medical knowledge.

Who can participate?

- **Men & women 18-65 years old**
- **Overweight, pre-diabetic, & diabetic individuals**
- Most diabetic, cholesterol, and blood pressure medications allowed!
- Exclusions: current nicotine use, pregnancy, alpha-blockers, beta-blockers, SSRIs
